Relevant Experience

Frontend Engineer | AVVIC group | May 2023 — Present

- Crafting, styling, and delivering high-quality websites for diverse clients using technologies like JavaScript, TypeScript, React, Next.js, SCSS, Tailwind CSS, and more.
- Collaborating with product/project managers, designers, and fellow engineers to transform creative concepts into refined digital experiences.
- Pitching innovative product ideas to the management, working closely with product managers and the tech team.
- Conducting thorough testing and debugging to ensure the website's flawless functionality and cross-browser compatibility.

Freelance web developer | AVVIC group | October 2023 - present

- Developed responsive and user-friendly websites for clients.
- Collaborated with clients to gather requirements, provided regular updates, and implemented requested changes promptly.
- Managed project timelines effectively, delivering the final product ahead of schedule, contributing to a remarkable 30% reduction in overall project delivery time.

Frontend Engineer | Campus neighbor | October 2022 & 2023

- Collaborated with other student designers and engineers on pro-bono projects to create new brands, design systems, and websites for organizations in the community
